Premium video meetings for everyone.

We re-engineered the service we built for secure, high-quality business meetings, Google Meet, to make it available for all, on any device.

See what you can do with Google Meet

Meet Safely

Meet uses the same protections that Google uses to secure your information and safeguard your privacy. Meet video conferences are encrypted in transit, and our array of safety measures are continuously updated for added protection.

[Learn more about security and compliance](#)

Meet from anywhere

Get the whole crew together in Google Meet, where you can present business proposals, collaborate on chemistry assignments, or just catch up face to face.

Businesses, schools, and other organizations can live stream meetings to 100,000 viewers within their domain.

Meet on any device

Invited guests can join an online video conference from their computer using any modern web browser—no software to install. On mobile devices, they can join from the Google Meet app. Guests can even join meetings from Google Nest Hub Max.

[Enable hybrid work with Chrome OS devices](#)

Meet clearly

Google Meet adjusts to your network speed, ensuring high quality video calls wherever you are. New AI enhancements keep your calls clear even when your surroundings aren't.

Meet with everyone

With live captions powered by Google's speech recognition technology, Google Meet makes meetings more accessible. For non-native speakers, hearing impaired participants, or just noisy ee shops, live captions make it easy for everyone to follow along (available in English only).
